DETAILED ACTION

Lack of Unity

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18, drawn to a process for initiating a reaction between methanol and a peroxide to produce a gas.

Group II, claim(s) 19-21, drawn to an apparatus for carrying out a reforming reaction.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the process for initiating a reaction between methanol and a peroxide to produce a gas can be made using materially different process or apparatus. Alternatively the apparatus for carrying out a reforming reaction can be used for other materially different gases. Each of the above groups belongs to a divergent subject matter, and there is no common technical feature to combine the groups, and hence the restriction is proper.

3. In view of the complex nature of the restriction requirements, a written restriction requirement is hereby made.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
